PROFESSIONAL SUMMARY

Full-stack software engineer and venture builder with experience delivering AI-enabled, cloud, data, web, and mobile products. I work from product architecture through implementation and deployment, with particular strength in multi-tenant systems, document intelligence, real-time applications, and operational workflows.

EXPERIENCE

Shockwolves BV, under Elewa | Engineering and Technical Leadership **Jan 2026 - Present**

Nairobi, Kenya

Build enterprise data platforms and document-intelligence workflows using Python, TypeScript, AWS, Redshift, dbt, React, and GraphQL. Designed TIVTAV's dedicated tenant environments across networking, identity, storage, and data warehousing, with infrastructure as code and automated onboarding. Connected operational-document classification and extraction to secure tenant pipelines and practice-facing intelligence for dental organisations.

Elewa / Italanta | Full Stack Software Engineer **Aug 2023 - Present**

Nairobi, Kenya

Develop AI-driven education and conversational products using Node.js, Python, TypeScript, Flutter, GraphQL, and cloud services. Designed FarmBetter's IVR flow, connecting Azure TTS, Twilio, Google Cloud Functions, and AI-assisted agricultural advice for low-connectivity contexts. Contributed to Repsafe, an AI crisis-communication workspace that brings context, assisted drafting, team review, and approval workflows together.

Three Point Devhub | Lead Software Engineer and Co-founder **Venture Building**

Nairobi, Kenya

Lead full-cycle delivery from product framing and architecture to web, mobile, backend, cloud, and deployment work. Built Blue Box AI: camera-event detection, stored events, background alerts, a monitoring dashboard, and WhatsApp queries for operational questions. Built Zuka Safari's passenger and driver applications with shared Flutter services, real-time vehicle data, routes, fares, and trip management. Developed Socio's video-led social discovery product across Flutter mobile, companion web, and admin experiences. Built MUG SACCO across Flutter member and staff apps, a React back office, and Django REST workflows for savings, loans, accounting, reporting, and audit history.

Netbot Solutions | Full Stack Software Engineer **Oct 2022 - Jul 2023**

Nairobi, Kenya

Designed property and visitor-management workflows with Django REST APIs, Flutter applications, role-aware authentication, notifications, and reporting.

Novatta Africa | Web Developer **2019 - 2024**

Nairobi, Kenya

Delivered client-facing web applications, e-commerce experiences, payment integrations, and accessible interfaces for startup and commercial clients.

SELECTED PRODUCT WORK

Product	Focus	Contribution
TIVTAV	Cloud / data	Secure document intelligence for dental practices, including dedicated tenant infrastructure, operational-document extraction, and practice analytics.
Repsafe	AI workflows	Collaborative crisis communication with AI-assisted drafts, shared context, review, and approvals.
MUG SACCO	Fintech	Member and operations platform for savings, loans, transactions, accounting, audit trails, and notifications.
Socio	Mobile + web	Video-led social discovery with mobile, web, admin, moderation, and communication workflows.

TECHNICAL SKILLS

Backend and APIs: Python (Django, FastAPI), Node.js, TypeScript, GraphQL, REST APIs
Frontend and mobile: React, Angular, Vue, Flutter, Dart, Tailwind CSS
Cloud and data: AWS CDK, Redshift, dbt, PostgreSQL, Firebase, Redis, Docker, CI/CD
AI and real-time systems: LLM integration, document extraction, computer vision, NLP workflows, Firestore, Celery

EDUCATION AND CERTIFICATIONS

BSc Mathematics and Computer Science | Jomo Kenyatta University of Agriculture and Technology
Certifications: Software Development for Cloud Computing (Coursera); EF SET English Certificate (C2 Proficient)
